Keeper Volunteer

Northumberland Country Zoo is looking for hard working and dedicated volunteers to assist its team of keepers in all their daily animal husbandry tasks.

This is an amazing opportunity and would suit students completing related studies who want to add some practical experience to their learning. Keeper volunteers would be required between 08:00 and 17:00 during summer months and 08:00 and 16:30 during the winter.

This role is physically demanding and requires a willingness to 'get your hands dirty!', but it is very rewarding.

Although it is not necessary, those with previous husbandry experience, an animal care qualification, or who are studying for one, do have an advantage when applicants are many.

To express your interest, or to find out more, please e-mail h.webb@northumberlandzoo.co.uk detailing when you would like to volunteer, as well as any skills or experience you feel may be beneficial to the zoo.
